CARE AND CLEANING

Stainless Steel

Rinse your stainless steel sink thoroughly after each use, and use a dabbing action to dry with a clean, soft cloth. Clean stainless steel once a week.

Always apply stainless steel cleaner/polish with a nonabrasive cloth or sponge, working with, not across the grain. **Do not** use steel wool, wire brushes or abrasive pads to clean your sink.

If you use cleaners containing chlorides, be sure to rinse the surface immediately after you clean it to avoid corrosion. **Do not** allow cleaners to remain in contact with the sink surface for long periods of time.

Kohler kitchen sink accessories, including bottom basin racks, wire rinse baskets, cutting boards and colanders will help protect the surface of your sink.

If the surface becomes excessively dirty, consider using baking soda, or a general purpose cleaner.
