# INSTALLATION

# **MILANO SLIDE SHOWER**

# **INSTALLATION - CONTINUED**

- 1. Select a location on a vertical wall to install slide rail according to rough-in dimensions. Note: It is recommended that the slide rail is fixed to timber studs or nogs in the wall.
- 2. Install a G1/2"B water supply nipple (1) (not supplied), ensure the distance from the end of nipple to the finished wall is between 10mm and 15mm.
- 3. Fix top & bottom base (2&3) to the wall with supplied screw set (4).
- 4. Move the hand shower bracket (5) to the centre of the slide rail.
- 5. Mount the slide rail to the top & bottom base (2&3). Ensure the those two round clips on the base are clicked completely into the holes in the mounting bracket (6&7).
- 6. Apply thread tape to the water supply nipple.
- 7. Fit the O-ring into groove at the back of elbow (8) and then screw the nipple onto the water supply nipple clockwise until the back surface of the elbow touches the wall. Ensure the outlet of the elbow faces down.
- 8. Connect the shower hose (9) to both elbow and handshower (10).

# **CLEANING INSTRUCTIONS**

Clean all finishes with mild soap and warm water. Wipe entire surface completely dry with a clean soft cloth. Many cleaners may contain such chemicals as ammonia, chlorine, toilet chemials etc, which could adversely affect the finish and are not recommended for cleaning.

Do not use abrasive cleaners or solvents on Englefield fittings.
